## INVESTIGATIONS

"Freighter Frank" Frisk will present a documentary on the history of the S.S. Edmund Fitzgerald. Beginning with the keel being laid and the final Coast Guard follow up reports, this 60 minute documentary is packed with interviews and exclusive archive film from the actual building of the Edmund Fitzgerald and its launch near Detroit, Michigan.

Includes never-before-seen footage of the CURV III, which was used to first explore the wrecksite after it was found in 1976.

This is the first and ONLY documentary to include all of the expeditions who have explored the wreck, including the bell raising project!
